

Ready-to-use skin antiseptic with a long-term effect of at least 24 hours

Exposure time for skin which is rich in sebaceous glands prior to surgery: 2 mins

kodan® tincture forte colourless

Our Plus

- Long-term antimicrobial activity for a minimum of 24 hours
- Effective against a broad spectrum of microorganisms (bactericidal incl. mycobacteria and MRSA, yeasticidal, fungicidal, virucidal against enveloped viruses incl. HIV, HBV, HCV, HSV)
- Rapid acting and excellent skin compatibility

Application areas

- For preoperative skin prep / postoperative suture care
- For use prior to sugery catheterisation, injections, taking of blood samples, punctures, excisions, cannulations and biopsies
- To support general-hygienic measures in the prevention of fungal skin infections
- · For hygienic hand disinfection*

Instructions for use

Prior to all invasive surgery

- · Use kodan® without dilution
- Spray on or rub the relevant skin area with a soaked swab, assure a thorough wetting of the skin and pay attention to the exposure time in correspondence to the application area
- · Remove the excess product to avoid puddling

Prior to punctures of the joints and preoperative skin preparation

- Remove hair mechanically or chemically on the relevant skin area
- Preoperative antiseptic washing (e.g. with octenisan®) is recommended
- To avoid removal only use skin markers with sufficient alcohol resistance (e.g. Devon™ Surgical Site Mini-Marker)

Certificates

VAH certificate

Microbiological efficacy

Efficacy	Concentration	Contact time
bactericidal EN13727	ready-to-use	15 sec.
MRSA EN13727	ready-to-use	15 sec.
mycobactericidal EN14348	ready-to-use	60 sec.
yeasticidal EN 13624	ready-to-use	15 sec.
virucidal against enveloped viruses EN14476	ready-to-use	15 sec.
HSV EN14476	ready-to-use	15 sec.
Adenovirus EN14476	ready-to-use	10 min.
Rotavirus EN14476	ready-to-use	30 sec.

Application area	Concentration	Contact time
skin with a high density of sebaceous glands in accordance with VAH	ready-to-use	2 min.
skin with a low density of sebaceous glands: before injections and taking of blood samples in accordance with VAH	ready-to-use	15 sec.
skin with a low density of sebaceous glands: before punctures of the joints in accordance with VAH	ready-to-use	60 sec.
skin with a low density of sebaceous glands: for pre- and postoperative skin disinfection in accordance with VAH	ready-to-use	60 sec.

kodan® tincture forte colourless

Product data

Ingredients:

100 g solution contains: 2-propanol (Ph. Eur.) 45.0 g, 1propanol (Ph. Eur.) 10.0 g, biphenyl-2-ol 0.20 g. Other ingredients: hydrogen peroxide solution 30% (Ph. Eur.), purified water.

Chemical-physical data

Density ca. 0,90 g/cm3 / 20 °C

Flash point 24 °C / Method: DIN 51755 Part 1

Form liquid Not applicable рН

Special advice

For external use only. Keep pharmaceuticals out of the reach of children. In case of accidental contact with eyes rinse immediately for several minutes with plenty of water keeping the eyelid open. Due to the high alcohol content kodan® tincture forte colourless must not be applied on premature infants and neonates with immature skin (e.g. restricted barrier function of the skin).

Flammable. Do not expose to flames or electrical heat sources. When thermocauters or other electrical devices are used, let the product dry well to prevent adverse effects.

When used before glucose testing (e.g. Hämogluco-Sticks), let the product dry well to prevent adverse effects on measurement results.

When used before incision foils are used, let the product dry well to prevent impairment of adhesion.

Once the container has been opened the product should not be used for more than 12 months but not beyond the expiry date.
