desmanol®

Alcohol-based rub for hygienic and surgical hand disinfection with skincare components.

Our Plus

- meets the FDA clinical efficacy standards (TFM)
- norovirus efficacy tested within hygienic hand disinfection
- marked remanence effect

Application areas

- hygienic hand disinfection (EN 1500): Rub 3 ml into clean dry hands, contact time: 30 sec.
- surgical hand disinfection (EN 12791): Rub a sufficient amount into clean dry hands and forearms, contact time 90 sec.

Instructions for use

desmanol® is used undiluted. During the contact time for hygienic and surgical hand disinfection, doses of desmanol® should be applied in such a way that the hands remain well moistened over the entire application period.
