

octenisan® wash lotion and octenisan® md nasal gel for preoperative decontamination of skin, hair and nasal vestibules

## octenisan® Set

### Our Plus

- octenisan® wash lotion und octenisan® md nasal gel for preoperative decontamination in the convenient set
- For use from up to 5 days before the operation
- Provides security: comprehensive patient information for safe use of the product and to increase compliance
- Builds confidence: for the patient to have the feeling of being in the best hands

### Application areas

#### Preoperative Whole-Body washing

Recent studies show that decontaminating whole-body washing, whether preventive in ICUs or before surgery, can significantly contribute to the reduction of infection rates. Studies have shown that nasal colonisation by *S. aureus* plays a special role in the subsequent infection process. A bundle of several measures can successfully lead to reduction or avoidance of postoperative wound infections.<sup>1</sup>

### Product Profile

#### octenisan® wash lotion:

- mild and gentle wash lotion for the skin and hair
- for whole body washing against MDRO
- suitable for all skin types
- skin-neutral pH value
- free of artificial colours and perfumes

#### octenisan® md nasal gel (CE0297):

- decontamination by physical cleaning of the nasal vestibules
- to support treatment of irritated skin underneath the nasal opening
- for moistening
- excellent compatibility

### Instructions for use

The octenisan® Set can be given to the patient before the operation or recommended for private purchase in the pharmacy. The patient should already use octenisan® wash lotion and octenisan® md nasal gel up to 5 days before the operation .

#### octenisan® wash lotion (for 5 days once a day):

- Completely wet hair and body.
- Apply the wash lotion undiluted to a damp and fresh washcloth.
- Apply the wash lotion evenly to the entire body. Lather for 1 minute.
- Wash off thoroughly. Dry with a fresh towel.
- After each application: Put on clean clothing.

Do not use in children under the age of 3.

#### octenisan® md nasal gel (for 5 days twice a day):

- Apply a sufficient quantity of nasal gel onto a cotton swab.
- Apply the gel onto the surfaces of the nasal vestibules.
- Spread the gel by lateral compression of the nostrils. Remove excess gel.

Do not insert too deep in the nose. Do not use in children under the age of 1.

# octenisan<sup>®</sup> Set

## Product data
