the plus of pure  
performance

# esemtan®

The skin care range with freshness and a gentle scent

## esemtan® – and patients feel good in their skin.

esemtan® is a coordinated skin care line for medical body care for patients. The simple, natural care promotes a patient's sense of well-being. It leaves the skin with a fresh, cared for and pleasant feeling.

Feeling groomed contributes significantly to a person's psychological well-being. The older a person is, the more challenging it is to care for his or her skin and the more important specific body care is. Effective care with esemtan® helps improve a patient's condition and keeps the skin healthy.

esemtan® not only makes a patient's skin feel good but it also turns patient care into a beneficial experience.

Whether with the gentle, mild wash lotion or the odor-neutralizing cleansing foam, with lotions for normal or dry skin or nourishing bath oil which keeps the skin supple and elastic, or the refreshing, invigorating active gel – esemtan® covers every need.

# The medical skin cleansing and care line.

Sheabutter – restores the suppleness of the skin and regulates the moisture balance.

Sheabutter

Allantoin – has a soothing effect, provides moisture and supports cell renewal.

Allantoin

Jojoba oil – preserves the protective layer (hydrolipidic film) of the skin through a balanced supply of fat and moisture.

Jojoba oil

Soya oil – supports cell renewal and offers a moisture retaining and re-fattening effect.

Soya oil

### Remarkably easy: the brand-new hyclick<sup>®</sup> dispenser

- the pump and bottle are firmly combined to become one
- bottle change is easier than ever before and the risk of cross-contamination reduced
- effective protection against contamination

A new bottle with pump is used every time the bottle is empty – resulting in an effortless bottle change.

The 'first-opening' red safety clips ensure safety and security.

You will find more information here: [www.hyclick.com](http://www.hyclick.com)
